Biotechnical Faculty / PLANT PRODUCTION / MECHANIZATION IN PLANT PRODUCTION

Course:	MECHANIZATION IN PLANT PRODUCTION			
Course ID	**Course status**	**Semester**	**ECTS credits**	**Lessons** (Lessons+Exercises+Laboratory)
2861	Mandatory	3	7	4+0+1
Programs	PLANT PRODUCTION			
Prerequisites	-			
Aims	Introducing students to the study and application of mechanization tools			
Learning outcomes	Apply theoretical knowledge of mechanization in production practice, and understand technical-technological solutions of driving machines and tools. Selects and applies designed machine lines in production practice, and evaluates and organizes mechanical work. Recommend individual machines depending on the type of production, and plan a work program or technological project			
Lecturer / Teaching assistant	Prof. Dr. Velibor Spalević, MSc Darko Dubak, Mirko Bulatović			
Methodology	Lectures, exercises, seminar papers, colloquia and final exam.			
Plan and program of work				
Preparing week	Preparation and registration of the semester			
I week lectures	Place, importance and role of mechanization. Driving machines			
I week exercises	Place, importance and role of mechanization. Driving machines			
II week lectures	Internal combustion engines (SUS) and two-stroke engines			
II week exercises	Internal combustion engines (SUS) and two-stroke engines			
III week lectures	Tractors, exploitation of MTA (machine-tractor aggregates)			
III week exercises	Tractors, exploitation of MTA (machine-tractor aggregates)			
IV week lectures	Machines and tools for land systematization			
IV week exercises	Machines and tools for land systematization			
V week lectures	Machines and tools for basic tillage / Colloquium I			
V week exercises	Machines and tools for basic tillage / Colloquium I			
VI week lectures	Machines and tools for additional tillage (specialized machines)			
VI week exercises	Machines and tools for additional tillage (specialized machines)			
VII week lectures	Remedial colloquium I Mechanization in organic agriculture			
VII week exercises	Remedial colloquium I Mechanization in organic agriculture			
VIII week lectures	Mechanization in organic agriculture / Machines for applying organic fertilizers			
VIII week exercises	Mechanization in organic agriculture / Machines for applying organic fertilizers			
IX week lectures	Planting machines			
IX week exercises	Planting machines			
X week lectures	Machines and devices for the application of chemical agents in protection			
X week exercises	Machines and devices for the application of chemical agents in protection			
XI week lectures	Machines and devices / Colloquium II.			
XI week exercises	Machines and devices / Colloquium II.			
XII week lectures	Machines for removing products			
XII week exercises	Machines for removing products			
XIII week lectures	Mechanized harvesting / Remedial colloquium II			
XIII week exercises	Mechanized harvesting / Remedial colloquium II			
XIV week lectures	Mechanized harvesting (harvesters)			
XIV week exercises	Mechanized harvesting (harvesters)			
XV week lectures	Transport to processing facilities and warehouses			

XV week exercises	Transport to processing facilities and warehouses
Student workload	Weekly (4+1) 7 credits x 40/30 = 9 hours and 20 minutes. Structure: 4 hours of lectures, 1 hour of exercises, 4 hours and 20 minutes of individual student work, including consultations. During the semester: classes and final exam (9 hours and 20 minutes) x 16 = 149 hours and 20 minutes, necessary preparation before the beginning of the semester (administration, registration, certification) 2 x (9 hours and 20 minutes) = 18 hours and 40 minutes . Total workload for the course 7 x 30 = 210 hours. Supplementary work: work for exam preparation during the make-up exam period, including taking the make-up exam from 0-42 hours. Load structure: 149 hours and 20 minutes (teaching) + 18 hours and 40 minutes (preparation) + 42 hours (additional work).

Per week	**Per semester**
7 credits x 40/30=9 hours and 20 minuts 4 sat(a) theoretical classes 1 sat(a) practical classes 0 excercises **4 hour(s) i 20 minuts** of independent work, including consultations	Classes and final exam: **9 hour(s) i 20 minuts x 16 =149 hour(s) i 20 minuts** Necessary preparation before the beginning of the semester (administration, registration, certification): **9 hour(s) i 20 minuts x 2 =18 hour(s) i 40 minuts** Total workload for the subject: **7 x 30=210 hour(s)** Additional work for exam preparation in the preparing exam period, including taking the remedial exam from 0 to 30 hours (remaining time from the first two items to the total load for the item) **42 hour(s) i 0 minuts** Workload structure: **149 hour(s) i 20 minuts (cources), 18 hour(s) i 40 minuts (preparation), 42 hour(s) i 0 minuts (additional work)**
Student obligations	Students are required to attend classes, do seminar work, do exercises and do both colloquiums
Consultations	On the day when lectures / exercises are organized

Agriculture and Forestry, Vol. 60. Issue 1: 39-51.
Examination methods	Activity during lectures: 1 x 5 = 5 points Seminar paper: 1 x 5 = 5 points Colloquium: 2 x 20 = 40 points Final exam (oral if necessary) = 1 x 50 = 50 points. Grade Number of points: A (≥ 90 to 100 points); B (≥ 80 to < 90); C (≥ 70 to < 80); D (≥ 60 to < 70); E (≥ 50 to < 60) F < of 50
Special remarks	-
Comment	-

Grade:	F	E	D	C	B	A
Number of points	less than 50 points	greater than or equal to 50 points and less than 60 points	greater than or equal to 60 points and less than 70 points	greater than or equal to 70 points and less than 80 points	greater than or equal to 80 points and less than 90 points	greater than or equal to 90 points
