

Faculty of Medicine / STOMATOLOGY / DENTAL PROTECTION

Course:	DENTAL PROTECTION			
Course ID	Course status	Semester	ECTS credits	Lessons (Lessons+Exercises+Laboratory)
13984	Mandatory	11	4	2+2+0
Programs	STOMATOLOGY			
Prerequisites	There are no strings attached			
Aims	Course objectives: The aim of the course should ensure that the student, after completing the course from this optional module, improves his knowledge of the public health aspects of oral diseases, and based on that, plans the needs for preserving and improving oral health in all members of a certain community and proposes a preventive program.			
Learning outcomes	After completing the one-semester course and passing the exam in the Dental Association course, the Dentistry student should have the following learning outcomes: 1. Knows, explains and applies the principles of oral health promotion. 2. Knows and applies indicators of oral health 3. Analyzes and assesses the state of oral health. 4. Able to create a plan of preventive, prophylactic and therapeutic measures and propose a preventive program suitable for an individual, a certain part of the population or for the entire community. 5. Able to organize and implement a prevention program in the local community.			
Lecturer / Teaching assistant	Doc. dr Mirjana Đuričković			
Methodology	Lectures, exercises, colloquiums, seminars, final exam			
Plan and program of work				
Preparing week	Preparation and registration of the semester			
I week lectures	Introduction to the subject, definition and importance of the subject.			
I week exercises	Indicators of oral health. Methods of epidemiological research and monitoring of oral diseases. Determining the needs for oral health. Socio-medical aspects of oral diseases.			
II week lectures	Social and medical importance of oral health.			
II week exercises	Strategies in the prevention of oral diseases. Program protection in dentistry. Selection of topics for the seminar work			
III week lectures	Planning needs to preserve oral health.			
III week exercises	Promotion of oral health; Health education; Motivation of the individual and society. Literature review for the final seminar paper.			
IV week lectures	Methods of epidemiological research.			
IV week exercises	Organization and implementation of dental health care in the local community. Software protection. Program protection evaluation. National program of preventive dental health care			
V week lectures	Oral health indicators.			
V week exercises	Preparation of going to the field (written notification, permission to enter the institution and consent of the research participants) for the needs of the preparation of the seminar paper			
VI week lectures	The role of the environment in preserving oral health.			
VI week exercises	Preparation of the plan and program of going to the field			
VII week lectures	Program prenatal prevention of oral diseases.			
VII week exercises	Forming a research report, survey, questionnaire			
VIII week lectures	Programmatic postnatal prevention of oral diseases.			
VIII week exercises	Communication with members of the community for the purposes of developing a plan and program for going to the field			
IX week lectures	School dental care.			
IX week exercises	Going to the field and collecting data for the preparation of the seminar paper			
X week lectures	Preventive program - the role of the community.			
X week exercises	Going to the field and collecting data for the preparation of the seminar paper			
XI week lectures	Promotion of oral health.			

XI week exercises	Going to the field and collecting data for the preparation of the seminar paper					
XII week lectures	Health education - methods and means.					
XII week exercises	Going to the field and collecting data for the preparation of the seminar paper					
XIII week lectures	Dental care for certain categories of the population (special needs, elderly).					
XIII week exercises	Processing of data obtained from research in the field for the preparation of a seminar paper					
XIV week lectures	Organization of dental health care in the community, quality, evaluation.					
XIV week exercises	Processing of data obtained through research for the preparation of a seminar paper					
XV week lectures	Strategies in preserving oral health.					
XV week exercises	Presentation of the obtained results and defense of the seminar paper					
Student workload	Teaching and final exam: (5.33 hours) x 16 = 85.28 hours Necessary preparations before the beginning of the semester (administration, registration, certification): (5.33 hours) x 2 = 10.66 hours Total workload for the course: 4 x 30 = 120 hours Load structure: 85.28 hours (teaching and final exam) + 10.66 hours (preparation) + 24.06 hours (supplementary work)					
Per week			Per semester			
4 credits x 40/30=5 hours and 20 minuts 2 sat(a) theoretical classes 0 sat(a) practical classes 2 excercises 1 hour(s) i 20 minuts of independent work, including consultations			Classes and final exam: 5 hour(s) i 20 minuts x 16 =85 hour(s) i 20 minuts Necessary preparation before the beginning of the semester (administration, registration, certification): 5 hour(s) i 20 minuts x 2 =10 hour(s) i 40 minuts Total workload for the subject: 4 x 30=120 hour(s) Additional work for exam preparation in the preparing exam period, including taking the remedial exam from 0 to 30 hours (remaining time from the first two items to the total load for the item) 24 hour(s) i 0 minuts Workload structure: 85 hour(s) i 20 minuts (cources), 10 hour(s) i 40 minuts (preparation), 24 hour(s) i 0 minuts (additional work)			
Student obligations			Attendance at theoretical and practical classes is mandatory. Presentation of the seminar work and participation in the discussion on the given topic is mandatory and is graded.			
Consultations						
Literature			Vulović M. I saradnici: Preventivna stomatologija, Draslar partner, Beograd 2005.god. strane 13-34, 381-407, 343-369			
Examination methods			2 colloquiums of 15 points each; Practical teaching 15 points. Activity during lectures 5 points. Final exam max up to 50 points (Preparation of the final seminar paper 20 points. Defense of the final seminar paper 30 points) A passing grade is obtained if a minimum of 50 points is accumulated			
Special remarks						
Comment						
Grade:	F	E	D	C	B	A
Number of points	less than 50 points	greater than or equal to 50 points and less than 60 points	greater than or equal to 60 points and less than 70 points	greater than or equal to 70 points and less than 80 points	greater than or equal to 80 points and less than 90 points	greater than or equal to 90 points
